Dear Guardians/Parents,

As per **CBSE Circular No. Acad-105/2024 dated 12 December 2024** and the communication issued by the **Ministry of Education, Department of School Education & Literacy**, schools are encouraged to create awareness among students about **SATHEE - Self Assessment, Test and Help for Entrance Exams** — a free learning and assessment platform developed to support students in academic learning and competitive examination preparation.

SATHEE aims to provide equal access to quality education for all students, especially those who may not have access to expensive coaching or additional academic support. The platform is completely **free of cost** for students and schools, and is available through both the SATHEE website and mobile app.

SATHEE provides students with **video lectures by IIT professors and subject experts**, structured study material, NCERT-based resources, previous year questions, topic-wise tests, subject-wise tests, All India mock tests, notes, formulas, concept summaries and regular academic guidance. The platform supports preparation for **JEE, NEET, CUET, CLAT, ICAR, SSC, RRB, IBPS** and foundation learning for Classes 9 to 12.

A key feature of SATHEE is its **daily live doubt-clearing support**, where students can ask academic doubts and receive guidance from mentors and subject experts. SATHEE also conducts regular **free webinars, platform demo sessions, mentorship sessions, live crash courses, summer courses and exam-focused preparation programs** to help students learn in a structured and confident manner.

SATHEE also offers **AI-enabled learning features** to help students use technology appropriately for learning. These tools support students in identifying weak areas, tracking progress, receiving personalized learning support, understanding concepts better and improving through performance analytics. These insights can also help teachers and schools monitor student engagement and learning outcomes. SATHEE has also been featured at the **AI Summit** for its use of AI in education.

Recently SATHEE has shown encouraging academic outcomes, including strong performance in **JEE Main 2026**, 60+ students scored 99+ percentile where more than **500 students secured 95+ percentile**. In total 700+ qualified for the JEE Advance Exam.

Effective use of SATHEE resources, AI-enabled learning tools, dashboards, doubt-clearing support and student performance analytics for improving learning outcomes.
